

# COOPERATIVE COFFEES

PROUD MEMBER OF THE FAIR TRADE FEDERATION IN 2011

The products we carry come from low-income artisans and farmers in developing countries who are paid fair prices for their goods.

We purchase products from small-scale producers with whom we have developed long term and sustainable relationships.

Our producers work in safe and healthy conditions and many promote sustainable development within their communities.

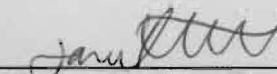

We also work to educate consumers about the difficulties facing small-scale producers in developing countries and the importance of purchasing fairly traded products.

This provides consumers with the knowledge that they can choose to make purchases that directly contribute to improving living and working conditions for the producers.

*This Fair Trade Pledge demonstrates a special commitment to creating a more socially and economically just global trading system.*
